

On 16 December 2008, Xi'an Lantian Yaobai Cement Limited, the fully owned subsidiary of WestChina Cement Limited, was awarded the "international standard product marking certificate" which was granted after strict inspections by both the Shaanxi and the Xi'an Technical Supervision Bureau. It not only demonstrates that our products meet the scrupulous criteria required for obtaining the International Product Standard but also that our cement quality management has advanced to a new benchmark level. This is another breakthrough in terms of our product reputation and brand awareness.
