

2500t/d Cement Clinker Production Line of Mianxian Plant Ignited Successfully

On 26 June, the ignition ceremony for the new 2500t/d Cement Clinker Production Line of Mianxian Plant was held successfully. Mr. Tian Zhenjun, Vice President of West China Cement Limited (WCC), Mr. Wang Jianli, Technical Director of WCC and Mr. Guo Zhengping, Project Manager of Suzhou Sinoma attended the ignition ceremony. The event was officiated by Mr. Luo Xianbo, Manager of Mianxian Plant.

In his speech, Mr. Tian Zhenjun highly praised the progress achieved by the project team and all construction organizations involved, and on behalf of the Board of Directors, expressed his most sincere thanks to all the staff who had worked hard on the project.

The successful ignition marks another major step made by WCC in “Developing the South of Shaanxi Province.” Once the plant commences production, it will not only promote the optimization of the cement industry in Hanzhong but also the healthy economic development in the region, contributing to the post-disaster reconstruction of Mianxian City and the countryside construction.
