

## Xi'an Metro Line 2 Was Open to Traffic

Recently, the first-stage project of Xi'an Metro Line 2 was open to traffic, which means Xi'an, an ancient city with historical details, is stepping into the construction of international metropolis.

In this project, West China Cement Limited (“WCC”) has won the bid for providing cement for the construction of most of tunnels. In order to provide high quality cement for the construction of Xi'an Metro, the Management of WCC has attached great importance to the project and arranged excellent technicians to provide on-site technical support.

It's noted that another six Metro Lines will be constructed in Xi'an. WCC is geared to seize such favorable opportunity to solidify its leading position in Shaanxi and make further contribution to the Western Development through providing high quality products and excellent services.
