

WCC Build the First-class Model Project of non-Coal Mine Restoration and Management in Shaanxi Province

WCC limestone mine closure & restoration and ecological garden construction project opening ceremony was held in Pucheng county, Shaanxi province recently. Vice director Huang Weiping from Shaanxi Environmental Protection Law Enforcement Bureau, vice director from Land Resource Bureau of Weinan city, Chairman Zhang Jimin and CEO Ma Weiping from WCC attended the ceremony.

Chairman Zhang Jimin said that WCC has been practicing scientific thesis of green water & mountain are golden and silver mountain which mentions by General Secretary XI, WCC is trying to build the first-class model project of non-coal mine restoration aiming to realize 17 limestone mines can reach the green mining standards across the country. The project is planning to build a large-scale cultural ecology garden with local cultural tourism resources to help local people make a better life.

Vice provincial governor Zhang Daohong of Shaanxi Municipal People's Government sent congratulation letter saying: government focus on promoting Green, Recycle and low-carbon development, insisting on development among protection and protection among development during the procedure of construction. WCC fulfills the social responsibility and builds green mine actively, local government should help enterprise build this project with high standard and efficiency to benefit local people and accumulate precious experience for model project of non-coal mine restoration around province and country.
