

West China Cement Limited (“WCC”)

Tongchuan 10,000-ton line project officially

commissioning

On the morning of May 28th, the commissioning ceremony of the WCC Tongchuan 10,000-ton Line Project was held. Mr. Shen Jun, Secretary of the Party Committee and Chairman of Sinoma International (Nanjing), Mr. Lin Zhong, General Manager of Suzhou Sinoma and other guests, as well as WCC Director-Mr. Ma Zhaoyang, WCC CEO-Mr. Ma Weiping, WCC Vice President- Ms. Wang Rui and other senior management attended the meeting.

At the ceremony, Mr. Lin Zhong introduced the construction of the project and Mr. Wang Yutao, secretary general of China Cement Association, read out the congratulation letter. Ms. Wang Rui pointed out that the construction of the 10,000-ton line is the result of concerted efforts and sincere cooperation between our working partners and Yaobai Group. The next step will be to step up equipment commissioning and supporting construction, and strive to achieve production and results as soon as possible. Regional economic and social development and industry innovation and upgrading make due contributions.

Subsequently, Mr. Shen Jun congratulated on the completion of the trial

operation of the project, and emphasized that Sinoma International will continue to use its own advantages to provide high-quality full-process services for Yaobai Group. Finally, Mr. Ma Weiping announced the official start of the commissioning ceremony, and the leaders of the meeting jointly unveiled the gilt gold, and the event came to a successful conclusion.

The Tongchuan 10,000-ton line project is an important practice for WCC to comprehensively promote high-quality and green development in response to the national intelligent manufacturing call. It is also one of the landmark strategic achievements of "transformation, upgrading and structural adjustment", which means that the company has taken a new step in extending the cement industry chain Steps. After the project is officially put into operation, it will become the first intelligent 10,000-ton demonstration production line in Northwest China, effectively driving the development of local logistics, environmental protection, comprehensive resource utilization and other related industries, and injecting more new momentum into the formation of new profit growth points for enterprises.
